HDT IN CAPACITY BUILDING

Capacity Building is one of the programs among the three interrelated pillars of HDT dealing with building the capacities of organizations and community to manage organizations and themselves, program and deliver better services.

The program operates

For the last five years the objectives and strategies has been designed consistently to meet the needs expressed in Cluster two of MKUKUTA (improvement of quality of

Life and social well-being), important document leading to aligned interventions towards the National Vision.

Most of interventions are linked to Goal 1 and 2.

The table below show the relation ship of projects and MKUKUTA Goals.
